

Introducing OdenBridge

Satellite-internet acceleration for yachts, jets & cruiseships.

200%

OdenBridge is a hardware accelerator that can increase onboard internet speeds by 200% or even more.

98%

Increased saturation, which means you get the full benefit of the satellite data plan you are paying for.

100%

OdenBridge can make the impact between dial-up and broadband speeds, which makes 100% difference.

Odenbridge

Compress it. Secure it. Transmit it.

We're changing the way data is secured and moved with our innovative SALT approach: Sea, Air & Land technology.

MEDIA AGNOSTIC GLOBAL NETWORK UNIFORM SATURATION

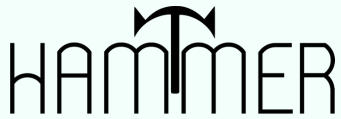

MAGNUS

ACCELERATION FOR SATELLITE INTERNET DATA FOR SALT: SEA, AIR & LAND TECHNOLOGY.

Odenbridge

Satellite-internet acceleration for yachts, jets & cruiseships.

Recreational

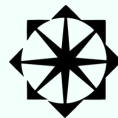

OdenBridge Hammer Edition is designed for yachts and private jets.

VALHALLA

Telecom & Beyond

OdenBridge Valhalla is nearly limitless, and designed for telecommunication providers servicing rural areas.

BI-FROST

Enterprise-class for business

OdenBridge Bifrost Edition is designed for cruise ships who are providing internet to customers and internal staff.

Non-invasive

OdenBridge is an all-inclusive hardware box that connects seamlessly in to an existing network.

Seamless

The beauty of OdenBridge is the simplicity. It simply works. Join our growing wait-list to experience the difference.

Secure

Proprietary patents accelerate and process all data locally on-site so no data is stored, read, intercepted in any way shape or form. OdenBridge is simply a pass-through (that works extremely well).
